

BLOCK PARTY AND BIRTHDAY BASH

For Green Lake's Giant Sequoia!

 Live music •  Tree protection Q&A •

 Family friendly

What's Going On?

Plans have been filed to remove a 120-year old Giant Sequoia in Green Lake for a driveway.

An AIA certified architect has reviewed the plan and confirmed that the same housing and parking could be built with small design changes. However, the city construction department, SDCI, will not request these changes to save the tree.

Preserving large trees is critical to Seattle's resiliency against heat and extreme weather, but Seattle has almost no tree protections for properties undergoing construction.

Join us Saturday to make a stand for this and other big trees in the city.

Act Now

Call Councilmember Strauss and ask him to stand up to tree loss in Seattle
206-684-8806

Join Us Saturday

Join us for a neighborhood gathering to let the city know we want large trees like this sequoia where we live.

 Sidewalk in front of 5834 Woodlawn Ave N

 Saturday, March 1, at 2 p.m.

Evergreens Protect Community Health

Green Lake's large trees and groves are essential climate infrastructure:

-  Buffer against heat and pollution from the nearby freeway
-  Filter and clear stormwater flowing into Green Lake
-  Protect and home wildlife
